WHOPPER PLOPPER® 60

The Whopper Plopper 60 integrates all the qualities you love about its older brothers into a 60mm frame. Its small enough for panfish to eat it and still big enough to entice those big fish into biting an easy meal.

Larry Wahberg

Armed with River2Sea Hook

WHOPPER PLOPPER® 75 & 110

While his big brothers utilize powerful chops of their tail to attract strikes the Whopper Plopper 75 relies more on quickness, with a unique sound more reminiscent of a buzz saw. The 75 is tailor made for topwater fishing in high pressure situations and when the forage base is smaller. Whopper Plopper 110 is the right combination of size, sound and strength. All the qualities to be the best all around topwater for anywhere in the world where predator fish are lurking.

WHOPPER PLOPPER® 90/130

Like the original, it casts a mile so it's great for combing large flats. It operates at speeds so slow you can't hear the tail, only the tiny glass beads that sizzle inside as the head shakes back and forth with each rotation of the tail. Speed it up and it throws water like a swamp buggy and has the same deep, hollow, plopping-fish-catching sound of the original!

WHOPPER PLOPPER® 190

Larry Wahberg

For decades savvy musky men have known that surface lures that made a certain deep throated hollow popping-plopping sound drove muskies crazy. The problem was if you found one with a "good" tail it would bend and get out of tune when it got bit by a fish, hit a rock or even just from repeat casting.

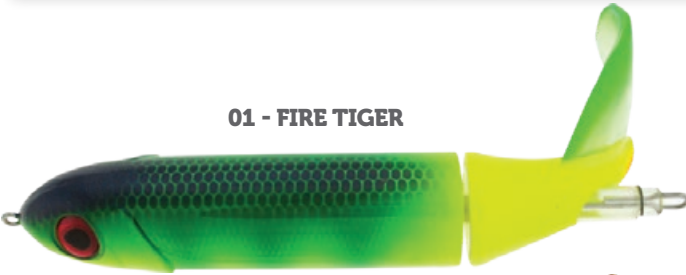

The Whopper Plopper is "roll resistant" and works well at a variety of speeds. Interestingly, sound experiments have suggested that even at constant speeds the tail kicks out sounds that vary as much as an octave in pitch as opposed to the more monotone metal tails.

BIG MISTAKE™ 160

The design process between an angler and the River2Sea engineers does not always work flawlessly, and just as the name suggest, this bait was born off a miscue between Bassmaster Classic Champion Chris Lane and the team at River2Sea. The unique size and shape of this bait provides a big profile for those giant bass to hone in on. The big soft plastic props move a large amount of water, which puts off a sound that the bass cannot help but seek and destroy.

LANE CHANGER™ 150

Designed in conjunction with 2012 Bassmaster Classic Champion Chris Lane, this topwater bait features our new soft plastic propellers, which give the bait precision action, and a very unique sound. With its subtle action, the bait puts off a small wake, intended for more of a finesse topwater approach to catching giant bass.

ROVER 98 & 128

Rover is the new generation of walking bait. Rover's action turns the leisurely weekend dog walk into a sprint through the park. Instead of the gliding action anglers are accustomed to, Rover's choppy, side-to-side slashing will draw vicious strikes like a pit bull attacking its prey. Rover's face features an exaggerated cupping that spits more aggressively than other baits of this genre. Rover's cupped mouth and geometry also create one of the most unique actions ever experienced in a lure of this type.

TOP NOTCH™ 130

This Chris Lane-designed topwater bait is perfect for targeting aggressive bass in and around bait fish. This bait is the "GO TO" when a large amount of commotion is needed on the surface. The soft plastic prop moves a great deal of water, and ceates a big wake. Also, the cupped lip creates spitting and popping action that leaves a bubble trail, that is irresistible to giant bass.

D-WALKER 100 & 120

The cousin to the Rig Walker is the D-Walker an unrigged paddle tail swimbait. Still the same great swimbait just rig it how you want it. You can run any jig head and the D-Walker has a specially designed tail to create maximum vibration and kick. The head shape creates an aggressive body wobble. It also has a slot to rig a belly weight swimbait hook with a blade or without.

S-WAVER 120

The smallest of the S-Waver family comes in at just over 4" and weighs in at a little less than an ounce. Its responsible for a lot of fish catches all over the world. It has a real natural "S-swimming action" and a slow sink. Control the swim depth of the S-Waver using the rod and reel. Raise the rod up to swim it higher in the water column like a wakebait, or lower the rod tip and let it be subsurface and give it a couple quick twitches on a slack line and watch it dart side to side or turn a complete 180 degree turn.

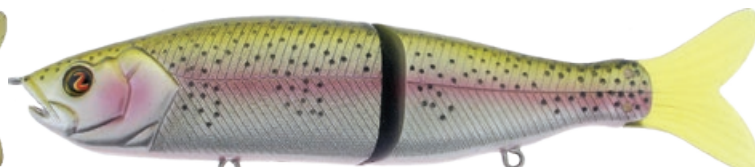

Armed with River2Sea Hook

S-WAVER 168 & 200

S-Waver is one of the most iconic swimbaits on the west coast.. It features a single joint that creates the natural "S-Action" swimming motion. S-Waver will seductively wake the surface and call big game fish in for a closer look. Hold your rod tip up and S-Waver is a surface lure, allow the bait to sink slowly and the S-action continues underwater. Armed with River2Sea Trebles anything that swipes at it is going to get the "bad news."

RIG WALKER 100 & 120

Available in two sizes, this may be one of the most versatile pre-rigged swimbaits on the planet. The Rig Walker has a specially designed tail to create maximum vibration and kick. The head shape creates an aggressive body wobble that demands attention. We also included a belly ring to attach a stinger hook or a blade. The Rig Walker is excellent for swimming through the shallows on a its own, or rig them on your Favorite A-Rig.

TACTICAL WAKE

The Tactical Wake 210 is the culmination of a decade-long design and refinement process between River2Sea and the guys at TacticalBassin. The amount of energy and collective knowledge poured into this bait is unparalleled! This 8" bait is capable of crawling across the surface at ultra-slow speeds never before realized in a single-joint, lipped

bait. Add a little speed to your retrieve and you'll encounter a hard thumping, aggressive waker with a deep knocking joint. Add reel twitches to your cadence and the bait will walk and dance in place with ease. All of these actions are achieved using a custom joint, unique lip design, and lifelike soft tail. The wake comes armed with custom 2/0 treble hooks, coated in teflon for maximum hook penetration. Available in a variety of color schemes specifically designed to mimic primary forage species around the country, you will not find a more versatile wakebait. River2Sea is once again pushing the limits of what can be achieved with a topwater.

SPITTIN' WA 55 & 70

Bully Wa II now has a new loudmouth cousin in the new Spittin' Wa from River2Sea. The Spittin' Wa features a clear, soft plastic cupped popping mouth with bubble jets at the base that leave a bubble trail for added attraction. Along with the cupped mouth, the body of the Spittin' Wa is sealed at the bottom to aide in keeping the frog afloat. It also features an air release port at the rear of the frog so that air can escape when the big fish strike, further increasing the hook up ratio. The Spittin' Wa features premium River2Sea Big Bite Hooks built to keep that fish pinned all the way to the net.

BULLY WA II 55 & 65

Bully Wa II has grown up! We took the best walking frog on the market and added some features to make it perform better. Bully Wa is the original keeled belly frog that walks easy in open water around cover, and now thanks to a sealed hook channel, it is one of the most buoyant frogs on the market. An increased belly profile gives Bully Wa II a larger profile to draw big strikes, and even better hook gap space for better hook ups. Bully Wa has been bullying bass into striking for years and it just grew up from schoolyard bully to a true enforcer.

PHAT MAT DADDY 70

One of the most versatile frogs ever created by Bass Pro Ish Monroe. The Phat Mat Daddy is designed to be fished over the thickest, nastiest cover or in open water. The softness of the plastic and placement of the hook on the top of the bait helps the frog be more weed less, and increases the fish landing percentage. The weight allows the fish to feel the frog's presence on the top of the mat. Ish's Phat Mat Daddy will be available in 8 of the best frog colors on the market.

MODEL	DESCRIPTION	WT. (OZ)	L. (IN)	HOOK	ACTION

OPENING BELL

Pushing the envelope of what's possible with a buzzbait, the River2Sea Opening Bell Buzzbait loudly calls to fish and tell them there is a free meal available.

Featuring a heavy-duty wire frame, the Opening Bell Buzzbait utilizes a large blade that sits directly in front of a hard plastic baitfish style body, which keeps the profile ultra compact and mimics a fleeing shad much more efficiently than a traditional buzzbait.

The blade sits on top of a brass rivet to create a loud squeaking noise and also contacts a solid brass knocker on every rotation so fish can hear it from greater distances. Behind the ABS injected main body, the Opening Bell Buzzbait features a hand tied skirt that adds even more lively flowing action and hides the razor sharp jig hook. If fish are short striking the bait, it comes with an optional treble hook that can be attached to the belly, which provides phenomenal hook-ups on fish that swipe at the bait in open water. Available in a large selection of colors, the River2Sea Opening Bell Buzzbait is unlike any other buzzbait on the market and will get you more fish.

BLING SPINNER BAIT

Bling comes in 3/8 and 1/2-ounce sizes, and will be available in two different blade combinations. This premium bait will be available in six colors; selected by Monroe himself.

The blades are constructed of a new metal alloy material, meaning the blades are lighter and thinner; this means they spin faster and easier to create more vibration. The thin material is also resilient, which means it will flex slightly and pop back into shape when contact is made with cover while casting. Bling is built on River2Sea's Big Bite black nickel hook and all skirts are hand tied for maximum durability in all conditions.

BIGGIE SQUARE BILL 57 & 67

Biggie Poppa (67) and Smalls (57) bring Ish Monroe's vision of everything that is needed in a square bill. Poppa is a 2-5/8 inch body, and Smalls is the 2-1/4 inch version. Both are designed to 4 wheel drive through cover and they have a unique body design that allows the bait to "swim" instead of "wobble." Biggie comes with razor sharp River2Sea hooks and can run anywhere from 2ft-5ft water depth.

TACTICAL DD CRANK 75

Designed by TacticalBassin's own Matt Allen and Tim Little, the River2Sea Tactical DD crankbait brings a new approach to crankbait fishing. With a tight action, loud rattle, and impeccable color patterns, this bait is designed for year round performance. While a proven fish catcher in warmer waters, this bait continues to shine throughout the coldest temperatures when other baits fall to the wayside. True year-round crankbait performance has been attained with the Tactical DD Crankbait! With their attention to detail and combined fishing knowledge, Matt and Tim meticulously designed and tested every aspect of this bait for big bass performance.

RUCKUS 75

Sometimes to catch a bass you need to make a little noise. That is the premise of the Ruckus lipless crankbait from River2Sea. Built to be one of the loudest lipless crankbaits on the market, Ruckus has a dual frequency rattle system that imparts low and high frequency rattle noises into the water. Ruckus has the profile of a big baitfish that appeals to large bass that are in the mood for a big bite. Ruckus is made with precise weight balancing that gives the lure a strong, tight wiggle, but also allows it to wiggle and waggle on the fall.

DIVER VIBE 65 & 80

Welcome back the River2Sea Diver Vibe. We are bringing the old school bait back with some new age tricks. You can still adjust the action and depth with the multiple position line ties (move the snap to gain your desired action). Every Diver Vibe comes with a blade to turn it into a tailspin. It gives the bait some more flash and vibration. We also changed the rear hook from a treble to a double hook (makes for changing to a tail spin easier).

Armed with River2Sea Hook

MODEL	DESCRIPTION	WT. (OZ)	L. (IN)	HOOK	OPTIONAL	ACTION

NEW JACK FLIPPIN' HOOK

Flippin' Hooks need to be one thing: **STRONG!** Ish Monroe took that one necessary trait and created a hook that is both strong and protects the line from damage due to heavy tungsten weights crashing on the knot at the line tie repeatedly. Thanks to the welded line tie on the shank of the hook, the New Jack Flippin' Hook allows the angler to run their line through the top line tie, then tie most popular knots to the second eye, and the motion of a hookset allows the tungsten weight and the hook to pop up and drive the hook point home.

MODEL	DESCRIPTION	PCS/PK
IM-NJF3/0	Ish Monroe New Jack Flippin' Hook 3/0 BN	4
IM-NJF4/0	Ish Monroe New Jack Flippin' Hook 4/0 BN	4
IM-NJF5/0	Ish Monroe New Jack Flippin' Hook 5/0 BN	4
IM-NJF6/0	Ish Monroe New Jack Flippin' Hook 6/0 BN	4

TRASH BOMBS

Compact and heavy, River2Sea's Trash Bomb is one of a kind in the "penetrating sinker" market. Trash Bomb combines the time-tested qualities of tungsten, with the subtle improvements that have made River2Sea a leader in tungsten technology. Trash bombs come with line protection inserts to guard against unwanted line breakage. Trash Bombs also feature River2Sea exclusive Natural Matte finishes. By using a Natural matte finish anglers avoid spooking fish by eliminating unnatural flash caused by glossy finishes.

MODEL	DESCRIPTION	WT. (OZ)	COLOR
TS-TB11/4	Trash Bomb 1 1/4oz.	1 1/4	Matt Black
TS-TB13/4	Trash Bomb 1 3/4oz.	1 3/4	Matt Black

TREBLE HOOKS

Backed By Popular demand we now offer our own treble hooks. Currently our 4x trebles will be available in three sizes:

- #1 (Whopper Plopper 130 hooks) 5 pcs/pack
- #2 (Whopper Plopper 110 hooks) 5 pcs/pack
- #4 (whopper Plopper 90&75 hooks) 6pcs/pack

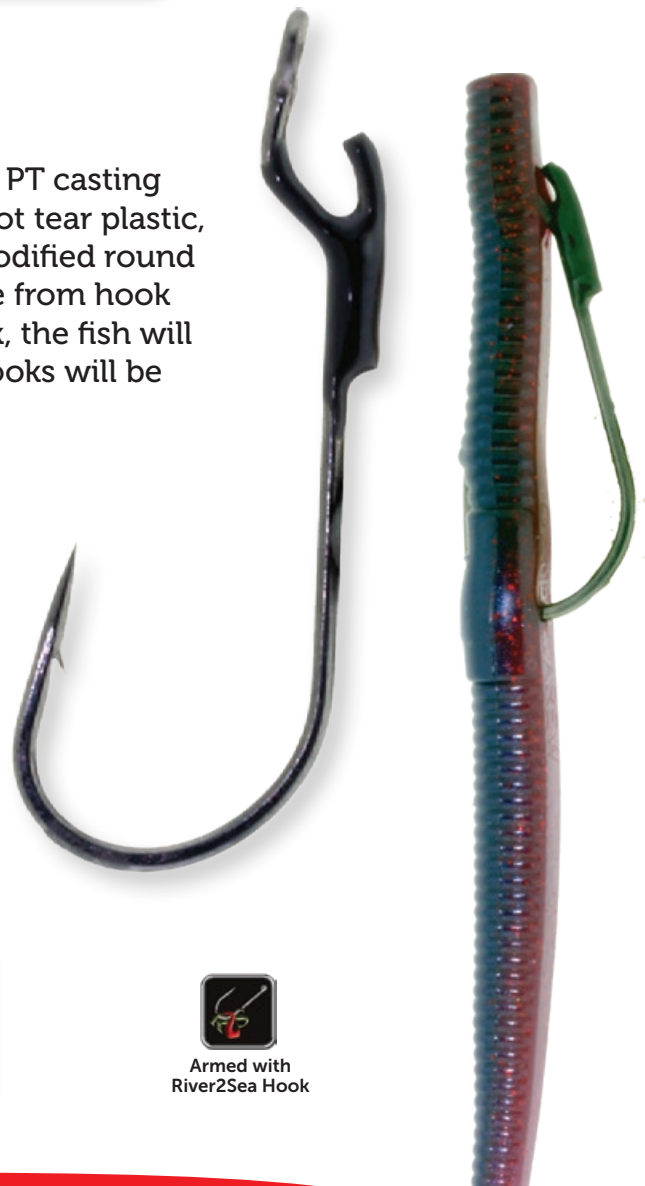

MODEL	DESCRIPTION	PCS/PK.

P.T. HOOK

Developed by Bass Pro, Peter Thilveros. The River2Sea PT casting hook features an integrated Welded Keeper that will not tear plastic, and securely anchors baits to the hook. River2Sea's modified round bend hook design provides the perfect precision angle from hook point-to-eye, that ensures that when setting the hook, the fish will get all of River2Sea's new wide angled barb. The PT hooks will be available in 3 fish catching sizes 3/0, 4/0, and 5/0.

MODEL	DESCRIPTION	PCS/PK.
PT-WH3/0	Peter Thilveros PT Hook 3/0 BN	4
PT-WH4/0	Peter Thilveros PT Hook 4/0 BN	4
PT-WH5/0	Peter Thilveros PT Hook 5/0 BN	4

CLACKIN' CRAYFISH® 90 & 130

There are lots of lures that look like a crayfish when they're sitting still, but they don't "do crayfish" when you move them. Until now, that is! In addition to looking exactly like a real crayfish in every detail, the Dahlberg Clackin' Crayfish's amazing hinged lip appears to actually grab water and pull the critter forward, exactly like a real crayfish! On free fall it even sinks like a real crayfish! You can fish it like a jig, or swim it along the bottom, fish it around drops, flats or weedlines.

Armed with River2Sea Hook

MODEL	DESCRIPTION	WT. (OZ)	L. (IN)	HOOK	ACTION
CLC90	Dahlberg Clackin' Crayfish 90	3/4	3 1/2	River2Sea (BN) 2X Strong #3/0	Sinking
CLC130	Dahlberg Clackin' Crayfish 130	1 5/16	5	River2Sea (BN) 2X Strong #5/0	Sinking

STANDIN' YABBIE 80 & 100

Stand'n Yabbie isn't afraid to stand up to bass! Crawdads are a favorite food item for bass and they don't give up without a fight. A Crawdad assumes a defensive posture with claws held high, as their last act of defiance before becoming dinner. Stand'n Yabbie is designed to mimic that stance; with one major difference, this crawdad bites back!

NEST RAIDER 128

Pitch the Nest Raider into the bed and shake the rod tip. Watch the tail come alive and stand the cradle robbin' Nest Raider up on his nose and shake it on that sweet spot. Big bass can't stand to see this beast robbing their nest. They inhale and don't spit it.
